## **Complete Healthcare International takes out 2<sup>nd</sup> place Expatriate Living Reader Awards**

The team at Complete Healthcare International was excited with the recent news that they had been awarded 2<sup>nd</sup> place in the Expatriate Living Reader Awards 2010 under the GP and Family Doctors category.

This is an amazing recognition to the hard work and dedication of the Complete Healthcare team, after only opening its doors in 2008.

Complete Healthcare International, founded and run by Australian GP Dr Kim Hayes, is a family medical clinic staffed by doctors and nurses from all over the world. Housed in the gardens at Rochester Park, the Clinic provides services for the whole family, including wellness checks, immunisations, nutritional medicine, minor procedures, cryotherapy, travel medicine full contraceptive services and well baby services.

On receiving news of the award, Dr Hayes was elated at the recognition the clinic has received. "Receiving news that we had placed second in this category was very exciting. The entire team at CHI needs to be congratulated for their dedication to working together to help build this business, from the ground up. It is easy to forget that we have only been in business for such a short time, and to be competitive with other companies who have been around for 10+ years is very encouraging. I hope the whole team looks at this achievement positively and continues to be part of the growing success that is Complete Healthcare International", said Dr Hayes.

Dr Hayes also mentioned the many patients who voted in the awards. "So many of our new patients hear of the clinic through word of mouth. For us, this is the best advertising around. To have our patients personally recommending our doctors and services to their friends and families is a true testament to the level of professionalism at Complete Healthcare International. A big thankyou to all the patients who took the time to vote, and for being so patient with us during our early years. It is with the feedback from our patients that many improvements have been made to the clinic, and we hope to continue being able to provide exceptional healthcare to our patients and their families for many years to come" added Dr Hayes.
